

A

Cohort 2 change-score correlations (n = 9)

Pearson r with two-sided 95% CI

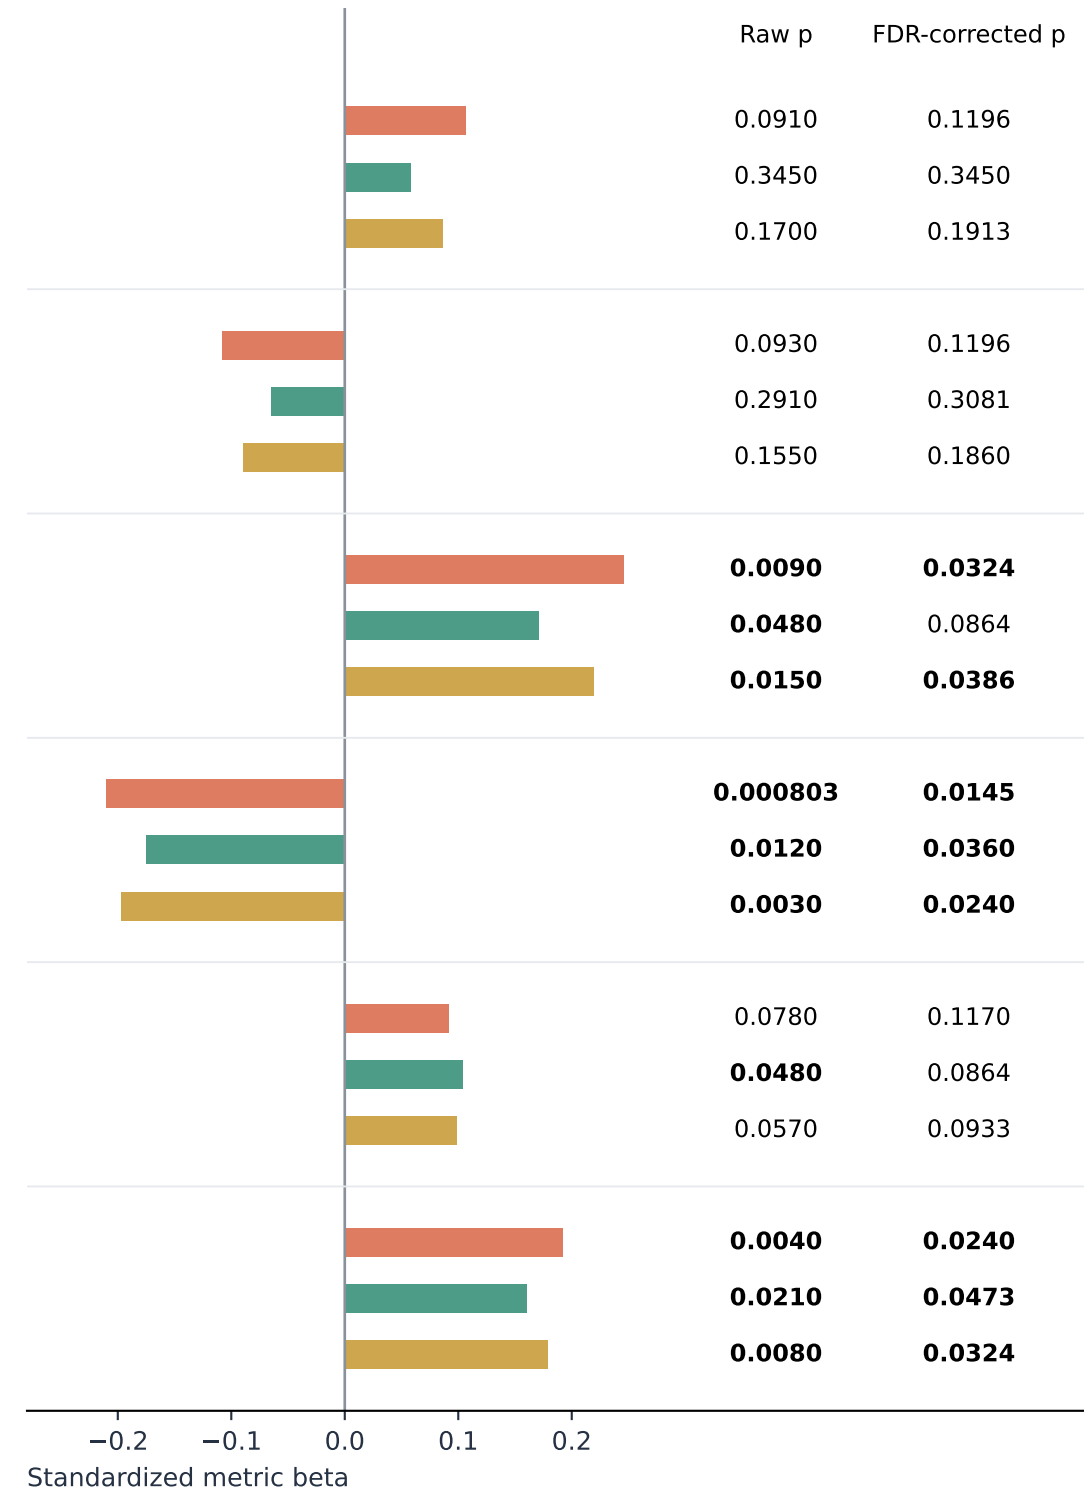

Benjamini-Hochberg FDR correction applied separately to the 18 tests in each panel. Bold: p < 0.05.

A: full sample, including active and sham participants; two-sided Pearson tests; unadjusted 95% CIs.

B: model estimates and raw p values retained at the precision stored in the original Figure 4 script.

B

Cohort 1 longitudinal FMA-UE mixed models

Standardized metric beta
